SUBJECT Carrier Frequency Development in East Germany

NO. OF PAGES 1

PLACE ACQUIRED

NO. OF ENCLS. (LISTED BELOW)

DATE OF INFO.

SUPPLEMENT TO REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE PENALTIES FOR THIS VIOLATION ARE PRESCRIBED BY LAW.

THIS IS UNEVALUATED INFORMATION

- 1. Dr. Henkler (Pru), main department chief, at a meeting of specialists on carrier telephony which was held in the Post Central Administration on 4 November 1952, severely criticized the development work of the Leipzig RPT-Formelwerk on carrier frequency technique, stating that the possibility of a transfer of this development work to the Werk fuer Fernmeldewesen HF in Berlin-Oberschoneneweide would be discussed by representatives of the Ministerium fuer Post- und Fernmeldewesen (Ministry for Post and Telecommunications) (MPF) and those of the Main Administration for Electrical Engineering of the MPF.
- 2. Dr. Henkler also said that the MPF had added a special filter coil laboratory to the Pupin coil laboratory of Kabelwerk Oberspree (Oberspree Cable Works) (KWO), which was to deal with tasks pertaining to carrier frequency technique and start producing prototypes of a quality equal to that of the respective West German devices. Dr. Henkler stated that the KWO had furthered the pupinization of the Berlin - Leipzig - Plauen main line south and the Berlin-Hostock main line north to such an extent that the frequency limit of the transmission ranges could be increased from 3.5 - 5 kilocycles per second to 20 kilocycles per second.

Comments: East German Ministry for Machine Construction.
